

# RB Expert

Version 2022

Demo Documentation

# Thanks for being with us!

## RB Expert team!

We would like to take this opportunity to thank you personally!

RB Expert is a project that aims to allow all its members to increase their monthly income, this without spreading false truths but, with the application of mathematical concepts!

The following small table will show you the result of our study based on the Forex market for the last 2 years. **And they are amazing!**

Symbol	Initial amount	Final amount
GBPUSD	10'000.-	14'700.-
EURGBP	10'000.-	12'800.-
EURJPY	10'000.-	11'000.-

As you can see, every symbol took home its share of the profit, moreover, these results in a real situation would further improve thanks to the compound interest that each currency would give to the other.

**In light of these tests, with a little luck, RB Expert will be able to double your capital every year.**

# Time to setup your demo environment

## MT4 MX Demo account

1. Download and install the MT4 app on the following link:

<https://www.xm.com/mt4>

2. Now, you have to create a demo account:
